

## FACT SHEET

### Infrastructure Projects:

- Airports
- Bikeways
- Bridges
- Drainage Control Facilities
- Flood Control Facilities
- Libraries
- Parks
- Recreation Centers
- Police Stations
- Fire Stations
- Lifeguard Stations
- Street Improvements
- Street Lights
- Traffic Signals
- Utilities Undergrounding
- Water Facilities
- Sewer Facilities
- Water Pipelines
- Sewer Pipelines

## SEWER & WATER GROUP 809

### Background

The City of San Diego has more than 3,250 miles of water and 3,000 miles of wastewater pipelines to provide water and wastewater services to its businesses and residences. Some pipelines are more than 100 years old, are deteriorating, and are in need of replacement, repair and upgrades. To avoid future service disruptions, such as sewer main stoppages, spills and water main breaks, the aging pipelines are replaced or rehabilitated. The new pipelines will bring the existing sewer and water mains up to modern standards, accommodate community growth and reduce maintenance requirements.

### Project Overview

Sewer & Water Group 809 will replace and/or install approximately 7,840 linear feet of 8-inch, 10-inch, 12-inch and 15-inch sewer main and approximately 8,035 linear feet of 8-inch water main. This project will also connect the existing sewer and water lateral services to the newly installed mains, curb ramps, and street resurfacing.

Normal working hours will be Monday to Friday, 8:30 a.m. to 3:30 p.m. These hours may be adjusted to accommodate unforeseen circumstances. Traffic control plans will be implemented to maintain the flow of traffic and pedestrian safety. No work will occur, on streets west of La Jolla Shores Drive, during the summer moratorium. The contractor will be directed, at all times, to keep the area as clean as possible from dirt and dust.

### Project Schedule

Construction: March 2012 through January 2013\*

\*All dates are approximate and subject to change.

### Project Budget

The project's planning, design, and construction budget is \$7 million.

December 2013
